DeKalb County SWCD
Conservation Plant/Tree Sale

Tree Pick Up: Friday May 8, 2009
Order deadline: Friday May 1, 2009

The DeKalb County SWCD offers all programs and services without regard to race, color ,national origin, religion, sex, age, marital status, or handicap.

INTRODUCTION

Once a year, the DeKalb County SWCD offers area residents an opportunity to contribute to the preservation of their community. By purchasing these conservation plant materials, you will be supporting your local Soil and Water District and contributing to the natural resource programs in DeKalb County. There is a wide variety of species available to enhance your property by providing shade, blocking costly winter wind, and reducing traffic noise. Conservation plants also provide soil erosion control, groundwater recharge and protection. Trees and shrubs provide food, cover, and nesting habitats for wildlife.

HOW TO ORDER

Simply read through our brochure to make your selection. Fill out the order form with your selection, name address and phone number. Return your order form with a check made payable to **DeKalb County SWCD**. Orders may be placed until May 1, 2009. The plant materials will be available for pick up on Friday, May 08, 2009 from 12:00 p.m. to 6:00 p.m. at the DeKalb County Farm Bureau Center for Agriculture, 1350 W. Prairie Dr., Sycamore. We will send you a notice of time, date, and location for a reminder.

All proceeds generated from the SWCD plant sale go to continuing conservation efforts in the DeKalb County Soil and Water Conservation District. The SWCD cannot accept responsibility for the size and viability of plants. The SWCD give no warranty expressed or implied as to growth or productivity. Size provided in the brochure is as stated by the nursery. We have selected plant species that are well adapted to our climate extremes and growing season, however successful planting depends on proper site, selection, planting and maintenance. An amendment to the SWCD Act (section 22.05) requires the following statement: "These plants are for conservation purposes only and shall not be used as ornamentals or landscaping."

1: Unpack tree and

soak in water 3 to 6 hours. Do not plant with packing materials attached to roots, and do not allow roots to dry out.

2: Dig a hole, wider than seems necessary, so the roots can spread without crowding. Remove any grass within a three-foot circular area. To aid root growth, turn soil in an area up to 3 feet in diameter.
